Working With ENEA

- Review of our charring and briquetting technology
- Review of our drying methods
- Review of internal systems and operation to identify inefficiencies

Results of our work with ENEA

- Improved the design and capacity of our briquetting machines
- Improved the design of our kilns
- Improved the design of our drying stands
- We were able to motivate our farmers to produce more char

Our achievements to date

- We now reach 117,500 households on a daily basis
- We have created 7,800 jobs
- 12,459 acres of deforestation averted to date

Thank you
