WFP's involvement in SAFE

☞ *Addressing the serious challenges linked with access to cooking fuel for the most vulnerable people in humanitarian, transition, and development settings*

☞ → *through a multi-faceted approach.*

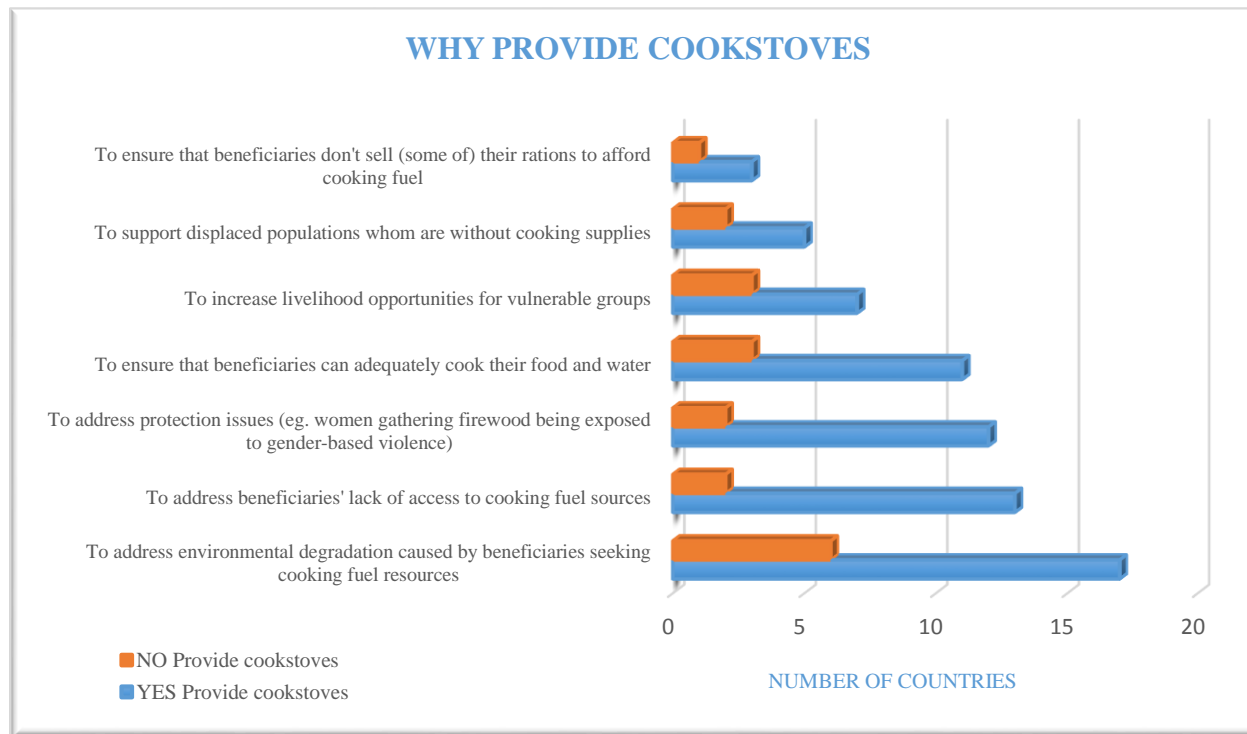

WFP's SAFE results to date (2009-2015)

- ☞ WFP has reached more than 2.8 million people in several countries through a diverse range of SAFE activities by 2014;*
- ☞ The SAFE Programme in Darfur (2014-2016) will help 2,7 million people safely cook their meals;*
- ☞ New SAFE initiatives are currently launching;*
- ☞ In 2015 SAFE is present in 15 WFP country offices plus an additional 12 with cookstove activities.*

WHAT ARE THE CHALLENGES ?

SAFE 2015-2020

-  *Commitment: WFP is keen to reach 10 million people through SAFE activities between 2015 and 2020.*
-  *Strategy: WFP is developing a corporate strategy in order to mainstream SAFE into its operations. Following the strategy a SAFE toolkit including communications, training and guidance material is being developed.*
-  *WFP units: In close collaboration with WFP's different units, SAFE is developing guidance on how to incorporate SAFE in different programmes.*
-  *10x20 campaign: To support the goal of helping 10 million beneficiaries safely prepare the food we distribute, a range of advocacy, training, knowledge sharing and fundraising activities will be rolled-out under WFP's SAFE Strategy (2015-2020) through the '10 x 20' campaign.*
-  *Global Cookstove Survey phase two: To identify new countries to implement, or scale-up existing SAFE programs, WFP is conducting a complete activity mapping exercise in relevant countries.*
-  *Current new programmes: WFP is scaling up SAFE programmes in Burundi and Sudan and is working on the final stages of a new SAFE programme in Kenya. Both Somalia and Nepal are working on providing institutional cookstoves through School Feeding Programmes.*
